

Boston® Materials –

MDD – MDR

One year further along the journey

What has Boston® Materials been working on in order to help our valued customers in their transition preparations?

- › A comprehensive suite of safety data for all materials.

Who does Boston® Materials work with in order to keep up to date with the most current developments with the new Regulation and Standards.

- › European trade federations, such as EFCLIN and EUROMCONTACT to ensure representation on MDCCG working groups.

How has Boston® Materials been keeping pace with the developments in the understanding of the new Regulation?

- › A dedicated global team of industry experts within the Bausch Health corporation.

Why should you stop by the Boston® Materials booth?

- › To meet industry professionals who are ready to help you succeed in your business.

When are the team going to be available?

- › All through the EFCLIN event – Thursday 25th to Saturday 27th April, 2019.
- › Come along to the booth, no appointment necessary.

Current Medical
Device Directive (MDD)

23 articles, 60 pages

New Medical
Device Regulation (MDR)

123 articles, 175 pages
